**SPRING 1982**  
**STUMPAGE PRICES**  
**PLANNING AND DEVELOPMENT DIVISION**  
**MAINE FOREST SERVICE AUGUSTA, MAINE**

MAINE DEPARTMENT OF CONSERVATION  
BUREAU OF FORESTRY  
PLANNING AND DEVELOPMENT  
Augusta, Maine

Prices presented in this report represent averages from price reports submitted by Service Foresters. Since prices have to be averaged, both higher and lower prices will prevail in specific zones. You are urged to consult your area Service Forester for accurate area prices.

FACTORS INFLUENCING STUMPAGE PRICES  
FOR FOREST PRODUCTS

Stumpage prices are influenced by a number of factors such as the following:

1. Percentage of the timber species in the area
2. Volume to be cut per acre
3. Size of average tree to be cut
4. Timber quality
5. Logging terrain
6. Distance to public roads
7. Type of logging equipment
8. Season of year
9. Woods labor costs
10. Landowner needs
11. Capital gains aspects of Internal Revenue Code
12. Market demand
13. Distance to market
14. Property taxes
15. End product of manufacture
16. Landowner knowledge of market value

Any one of the above factors can have a significant effect on stumpage prices for a species, while another factor may have an insignificant effect in a particular area.
